HIGH SPEED ALUMINUM CUTTING MACHINE

VAS L HS

The VAS L HS is a vertical, high-speed bandsaw with a moving head and fixed worktable and automated backgauge that is ideal for cutting large aluminum plates. The design and location of the backgauge allows for easy access to the worktable when loading and unloading material either by forklift or overhead crane.

This model has an overall compact and robust design. Thanks to decades of experience in sawing technology and technical expertise, this machine delivers high-performance with complete ease of operation.

Key Features:

- High speed cutting
- Simple to operate
- Hard metal blades
- Robust and heavy duty structure ideal for heavy
- Raised table support for an easy loading operation
- Movable work-gauge with clamping device
