

ALUMINUM CUTTING MACHINE

SV 640 TS

SVTS is a vertical bandsaw with a moving table for use in varying applications, flexibility and simplicity at its best. The material works its way through the saw by way of a moving table that runs along 3 linear way guides, driven by ball screws and brushless motor. It is possible to cut irregular shapes with or without the use of clamping.

The table features “T” slots that allow for convenient clamping of any material, even irregular shapes. The overall robust build and advanced technology are the main features of this machine. Expect optimum performance both with bimetal and carbide blades.

Key Features:

- Simple to operate
- Quick set-up
- Notch cutting can be set-up as well
